### FOR IMMEDIATE RELEASE

#### Ancom Announces New Space Saving Laptop Storage Cart

(Ancom Corporate Headquarters, Brunswick, OH) – Ancom now offers a mobile storage cart specifically designed to hold and charge up to 32 laptop computers, or a number of other peripheral computer devices.

The cart permits secure storage, convenient charging, and easy transport of laptops and other peripherals throughout any office, clinic or campus.

Translucent, retractable tambour doors allow visual inspection of contents when closed and require a smaller footprint than traditional swinging doors. Laptops are stored vertically, further reducing the amount of space needed by the cart.

Other features include a convenient handle location that provides an unobstructed work area on top of the cart and a ventilation design that allows for cooling airflow even when the doors are closed. The dividers that separate the stored laptops are also designed to assist with heat dissipation. These same dividers may be removed to accommodate storage of other devices or peripherals as well.

Ancom's Product Specialists are experts with a complete line of office and filing system solutions to match your station's exact needs. For more information, contact Ancom Business Products at 800-845-9010; or visit the website at [www.ancom-filing.com](http://www.ancom-filing.com).
