**FOR IMMEDIATE RELEASE**

### **Ancom's Add-A-Row Filing & Storage System Provides Additional Capacity**

(Ancom Corporate Headquarters, Brunswick, OH) – Ancom presents Add-A-Row, a low profile Lateral Track Mobile Filing & Storage System. This system provides convenient access to multiple layers of storage without the need for aisles. Add-A-Row easily integrates with existing cabinets or shelving to increase storage capacity while minimally increasing the system's footprint. Steel tracks are secured to any flooring surface in front of existing shelving, with cabinets mounted into mobile carriages.

The carriage system and wheels can support up to 1,000 lbs. per linear foot. The Add-A-Row lateral system can accommodate up to four times the number of files normally contained in a conventional 4-drawer vertical file. Heavy-duty storage comes with heavy-duty safety features including end stops on all rails, rubber carriage bumpers to absorb impact and protect fingers, and anti-tip constraints integral to the system.

This modular system can be expanded at any time to grow with your organization. Existing systems can be enlarged to two or three rows of mobile carriages. Multiple storage options are available; add the Add-a-Row to existing shelving or set up a complete lateral track system to fit your needs. System includes required track, cabinets, components, hardware and leveling shim kits.

Ancom's Product Specialists are experts with a complete line of filing system and storage solutions to match your exact business needs. For more information, contact Ancom Business Products at 800-845-9010; or visit the website at [www.ancom-filing.com](http://www.ancom-filing.com).
