FOR IMMEDIATE RELEASE

Ancom Offers Recycled Content and Green Seal® Compliant Filing Products

(Ancom Corporate Headquarters, Brunswick, OH) – Now it is easier for offices and clinics to ‘go green’ by choosing environmentally friendly filing products. Ancom offers new file folders made with recycled and/or sustainable materials. Products include end tab and top tab folders and file jackets, hanging folders and pockets, expanding pockets and wallets as well as pressboard and classification folders. These products meet Green Seal® criteria or are made of materials from sustainable growth forests as attested by the Sustainable Forestry Initiative (SFI) as well as the Forest Stewardship Council (FSC).

You can be certain that products with these seals have been manufactured with either recycled paper content, or use virgin fibers harvested from sustainable tree farms and not old-growth forests. Additionally, some of the most common papers such as 100% recycled manila, green hanging folder stock, and red wallet and kraft stocks are processed using chlorine-free methods.

These environmentally friendly filing products provide companies and organizations with more options when updating or converting their current filing system.

Ancom’s Product Specialists are experts with a complete line of office and filing products to match your exact business needs. For more information, contact Ancom Business Products at 800-845-9010; or visit the website at www.ancom-filing.com.
