### FOR IMMEDIATE RELEASE

#### Ancom adds Steel Lockers to Storage Lineup

(Ancom Corporate Headquarters, Brunswick, OH) – Ancom now offers a complete line of high quality steel lockers suitable for many indoor applications including secure storage of employees’ personal belongings in any office, school or work setting. Available in a variety of styles, configurations and colors, these lockers complement almost any space. Wall-mounted or free-standing, single, double and triple tier, singles or sets, widths from 7 ½ “ – 24”, depths from 12” – 24”, these versatile lockers are sure to meet most needs.

Constructed of 16-gauge steel, these sturdy lockers are designed to be durable and quiet. Heavy-duty steel construction, welded door frames and powder-coated enamel finishes resist dents and scratches. Full-length steel door reinforcements add rigidity and reduce door vibration, while rubber bumpers dampen locker noises. Polymer materials in latches and retainers further alleviate locker noise by reducing friction in the locking mechanism.

Recessed handles give a smooth, finished look to the lockers and are also vandal-resistant since they cannot be knocked off. In addition, a three-point latching system with a steel locking bar ensures that the door stays closed when shut. Locker options include legs, assembled or unassembled versions and ventilated or “c-thru” locker styles. Accessories such as number plates, extra coat hooks and benches are also available.

Ancom’s Product Specialists are experts with a complete line of filing system and other quality storage solutions to match your exact business needs. For more information, contact Ancom Business Products at 800-845-9010; or visit the website at [www.ancom-filing.com](http://www.ancom-filing.com).
